About Us

A Leading provider of remanufactured manual transmission, petrol & diesel engine, transfer box & final drive assembly services to many of the world's leading OEMs; MCT ReMan Ltd has forged longstanding relationships with customers

Ford, Jaguar Land Rover, GM Europe, Volvo, VW Heritage & the Unipart Group (London Taxi Company).

MCTR supports the OEMs aftermarket & warranty strategies whilst implementing a more

sustainable business model. Using our extensive skill base and product knowledge we provide specialist supply & recovery solutions at different stages of the product life cycle, from development to disposal. Recognised for our many years of expertise, innovation & exceptional product quality, we continue to generate process efficiencies & cost savings to provide cost effective original aftermarket replacement units.

Beyond Transmissions

Our remanufacturing expertise has historically been focused around FWD/RWD manual transmission & final drive assembly products (although we continue to work with the latest transmission technologies such as GNS stop/start). Since 2010 MCTR has continued to invest to develop an equivalent high quality service for engines

With significant ongoing investment in our rapidly growing engine remanufacturing capability, we have proven experience of bringing online successive remanufactured (& new build) petrol & diesel engines, servicing many of our key OEM customers. This capability has been fully supported at MCTR as we continue to win new contracts for engine production & remanufacture.

In addition to the core transmission & engine remanufacturing our engineering expertise covers a wide range of related sub-assemblies including cylinder heads, drive flanges, pistons, con-rods, crank shafts & gear assemblies. For all of these applications, we have built a strong reputation for product quality.

Operational Excellence;

MCT ReMan Ltd has accrued a variety of industry accreditations that demonstrate proven capability & allows for customer confidence in our expertise & products. We operate Quality and Environmental Management Systems that comply with the requirements of TS16949, ISO14001 & ISO9001. We are also a member of FER (Federation of Engine Remanufacturers) & have been awarded & continue to maintain FORD Q1 preferred quality status.

As a centre of reman operational excellence, MCTR are a trusted & proven partner for manufacturing, remanufacturing and turnkey component sourcing for world leading OEMs within the Automotive Industry. We strive to deliver an optimum service for our customers & to remain the preferred supplier for the remanufacture of OE powertrain products.
